Subject: Fw: National Psychologists Board Registration

Dear Sir/Madam,

I write regarding the proposals set out in the Consultation paper put out by the National Psychology Registration Board. This is a unique opportunity to set a high standard for the profession across Australia. I would hope therefore that the WA model would be adopted, offering as it does the highest requirement of training and supervision, both of which are entirely necessary for competent practice.

I would like to urge you to support the WA model (Option 1) for full registration at specialist level, as the only way to fully practice in the profession of Psychology in Australia. I would also like to urge you to support a "Psychology Registrar" level of registration which is also a part of the WA model, for people who have completed the Masters training and are undergoing the 2 years supervision process, instead of the Generalist registration.

Susan Thorman
Specialist Clinical Psychologist
