Fig 1: Change in numbers of approved supervisors^d

The data above shows the number of individual practitioners who are Board-approved supervisors in at least one supervision category. Data on the number of supervisors approved for different supervision categories is shown on the following pages.

^a Principal Place of Practice (PPP) is the address declared by the psychologist to be the address at which he or she is predominantly practising the profession. If the psychologist is not practising the profession or is not practising predominantly at one address the Principal Place of Practice may be the psychologist's principal place of residence.

^b As at 31 March 2013 there were 24,904 psychologists with general registration.

^c An overseas Principal Place of Practice means that the address declared by the psychologist to be the address at which he or she is predominantly practising the profession is an address outside of Australia or the psychologist has not declared a Principal Place of Practice and their principal place of residence is not in Australia.

^d The Board first published national data on the number of approved supervisors in March 2012.

Note. The figures in the table above include instances of the same supervisors counted more than once because they are approved to supervise in more than one endorsement area and/or for both principal and secondary

^e Registrar programs are undertaken by registered general psychologists in order to qualify for area of practice endorsement. For more information refer to the *Guidelines on area of practice endorsements* which are available from the website under the *Standards and Guidelines* tab.

^f Applies to secondary supervisors only; secondary supervisors do not have to hold endorsement in the same area of practice as the registrar program so they can be approved generally as a registrar program secondary supervisor for any area of practice or for specific areas of practice. Principal supervisors cannot be approved for any area of practice – they must hold the relevant area of practice endorsement.

Notes:

Table 3 includes the first figures that have been obtained for supervisors of provisional psychologists in the 5+1 Internship Program. The 5+1 program is the new pathway to general registration and an alternative to the 4+2 internship pathway or the higher degree pathway (i.e. Masters). For information on the 5+1 visit the 5+1 webpage under the *Registration* tab on the Board's website (www.psychologyboard.gov.au). Fifth year courses for the 5+1 program have so far been approved at higher education institutions in Queensland, New South Wales and Victoria; refer to the APAC website (www.psychologycouncil.org.au).

The Board also approves supervisors of higher degree students undertaking placements, however there is currently a transition period for higher degree supervisors and Board approval is not required until 1 July 2013. Therefore data on the number of approved higher degree supervisors and approved supervisors of higher degree students working in addition to placements will be made available after the end of the transition period.

⁹ Internship programs are undertaken by registered provisional psychologists in order to qualify for general registration. For more information refer to the 4+2 internship program and 5+1 internship program web pages under *Registration > Provisional registration*.
