

To Whom it May Concern

I am a Psychologist who has been practicing in the organisational context for over 20 years, in the fields of market research and management consulting. I have worked organisations from all industry groups, both public and private, across Asia-Pacific and the Middle East, and with employees at all levels of organisations including Senior Leadership. I currently work in the public sector in the area of Psychological Wellbeing.

I also currently supervise students, receive excellent feedback, enjoy the process very much and am keen to continue my involvement as mentor in this field. As my professional representative body, I wish the board to support me in my efforts to gain endorsement. I believe this could be achieved through some minor changes in the eligibility requirements.

Under heading 3 *Qualifications & Supervised Practice Requirements for Endorsements*, I suggest an option under point d) that states that "*Substantial equivalence* could be established in a case where the professional has at least 10 years post-Registration work experience in the Area of Practice field and able to provide work samples that meet the competencies required to enter the Registrar Program".

Without this change I will no longer be able to supervise students in the future, unless I do another degree which is not an option for me at this point.

With thanks

Anita
